

PREMIUM ACTIVEWEAR FABRIC COLLECTION

Engineered fabric directions for yoga, Pilates,
studio wear and premium athleisure.

BSCI Certified Factory · OEM / OBM · Private Label

No fast fashion. No cheap goods. Serious about fit.

More Than a Sewing Factory

Premium activewear development starts with fabric behavior, pattern accuracy and construction control.

WHAT WE DO

We support brands from fabric selection to bulk production.

- Performance fabric sourcing
- Custom pattern & fit development
- Sampling & fit adjustment
- Private label trims & packaging
- Bulk production & quality control

BSCI Certified

Responsible manufacturing standards.

Fit-Focused

Pattern balance, shaping and movement comfort.

Premium Materials

Second-skin, sculpting, matte and studio fabrics.

Flexible Development

Suitable for emerging and growing brands.

Manufacturing Capability

Real production, real development support.

FROM SAMPLE TO PRODUCTION

- Fabric & trim review
- Pattern and sample approval
- Inline quality checks
- Final inspection before shipment

Fabric Selection Guide

Choose by product experience—not by composition alone.

01 BUTTER SOFT

Second-skin / studio

Softness 5/5 · Support 2–3/5

02 SCULPT & SUPPORT

Compression / training

Softness 3/5 · Support 4–5/5

03 PREMIUM MATTE

Athleisure / lifestyle

Softness 3–4/5 · Structure 4/5

04 LIGHTWEIGHT STUDIO

Tops / summer / layers

Softness 4/5 · Weight 2/5

Final composition, GSM, colors, MOQ and certifications are confirmed against the selected swatch and mill lot before sampling.

01 Butter Soft / Second Skin

For Pilates, yoga, studio wear and elevated everyday comfort.

DESIRED EXPERIENCE

**Barely-there softness
with clean recovery.**

- Buttery / peached hand feel
- Smooth matte surface
- 4-way stretch
- High recovery
- Comfort-led, light-to-medium support

**Best for: leggings • tanks • bodysuits • fitted
tees • studio shorts**

Butter Soft — Application Reference

Use imagery to judge drape, cling, coverage and silhouette—not only color.

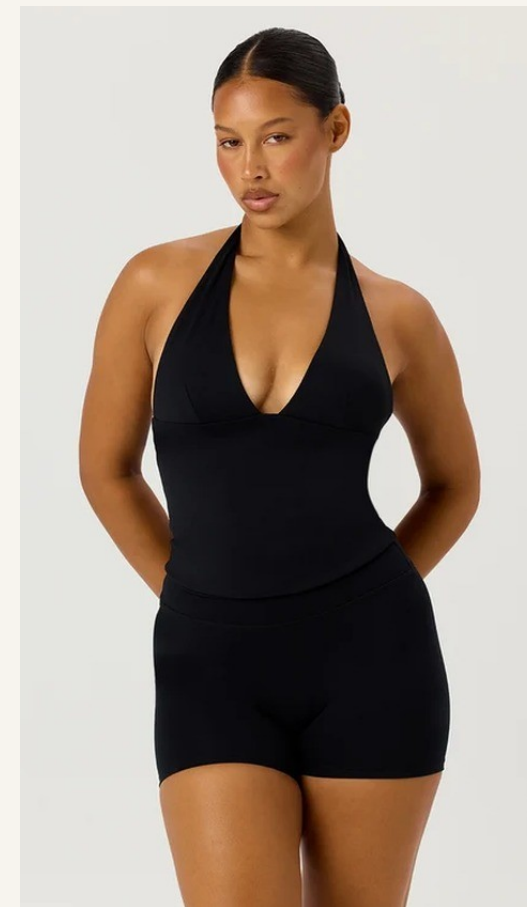

Square-neck tank

Fitted short sleeve

V-neck cami

Halter studio set

Reference imagery supplied for product-direction discussion. Final development should be customized to your brand.

Butter Soft — Typical Development Range

A benchmark to start fabric matching. Final values depend on the selected mill article.

Composition

75–80% Nylon
20–25% Elastane

Weight

220–260 GSM

Stretch

4-way

Recovery

High

Finish

Matte / lightly brushed

Support

Light–Medium

Recommended: Pilates leggings, yoga sets, studio tops, bodysuits and comfort-first athleisure.

02 Sculpt & Support

For body-contouring leggings, training shorts and supportive bras.

DESIRED EXPERIENCE

Secure hold without rigid movement.

- Medium-high compression
- Strong recovery
- Dense coverage
- Body-contouring support
- Suitable for structured seam work

Best for: sculpt leggings · training shorts · supportive bras · fitted jackets

Sculpt & Support — Product Applications

Construction and pattern placement matter as much as fabric compression.

Halter support top

High-rise compression short

Minimal support bra

Sculpt & Support — Typical Development Range

Technical benchmarks for higher-support activewear.

Composition

70–75% Nylon
25–30% Elastane

Weight

260–300 GSM

Stretch

4-way

Recovery

Very high

Finish

Smooth / dense matte

Support

Medium–High

Opacity / squat-proof performance must be confirmed on the selected color and finished sample under stretch.

03 Premium Matte / Structured

For elevated athleisure, studio-to-street and lifestyle collections.

LOOK & FEEL

**Quiet surface.
Clean drape.
Premium visual
weight.**

- Matte, low-shine finish
- More structure than second-skin
- Suitable for matching sets
- Works well in black, chocolate, navy and ivory

04 Lightweight Studio / Tops

For camisoles, fitted tees, halters and summer studio layers.

Halter top

Cami

Soft pink cami

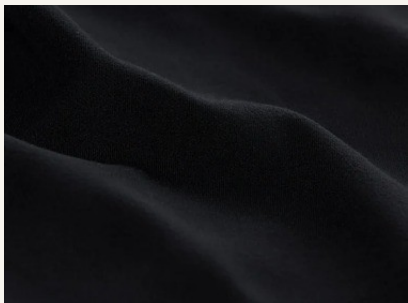

Butter yellow cami

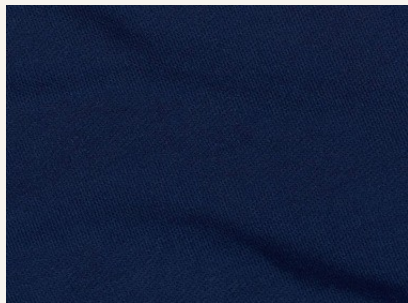

Recommended focus: soft hand feel · flexible drape · light support · clean edges · comfort in warm-weather collections

Color Library

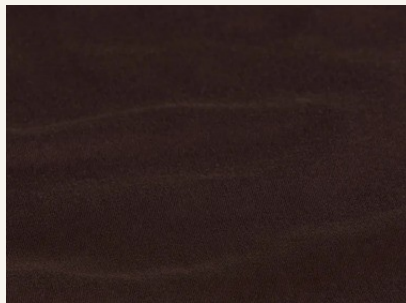

A visual starting point. Final availability and dye MOQ are confirmed per fabric article.

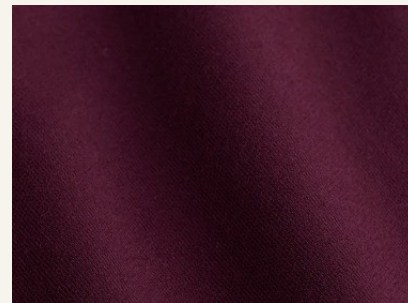

Black

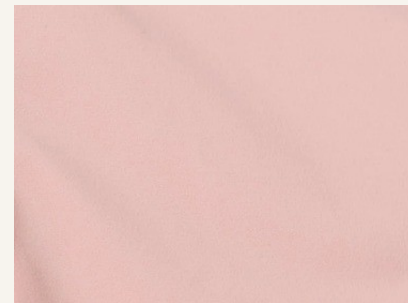

Navy

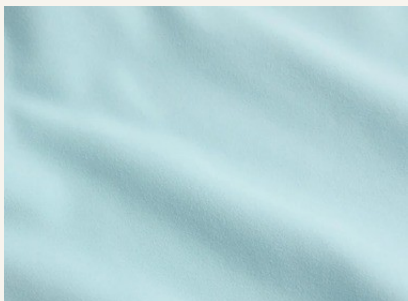

Chocolate

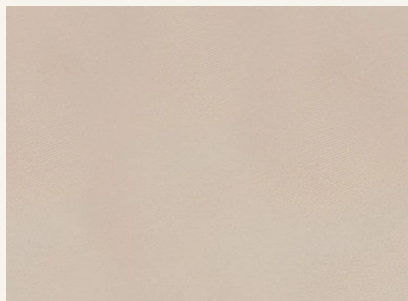

Wine

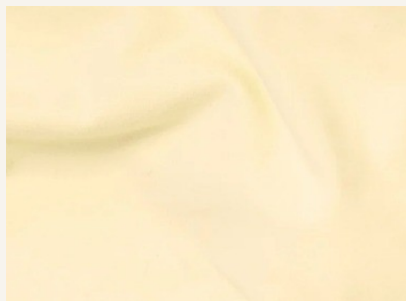

Rose

Sky

Sand

Butter

White

Custom color matching available subject to fabric mill requirements and minimum dye quantities.

Fabric Comparison Matrix

Use this before requesting swatches.

Fabric family	Softness	Support	Weight feel	Best use
Butter Soft	★★★★★	★★★☆☆	Light-Mid	Yoga / Pilates
Sculpt & Support	★★★☆☆	★★★★★	Mid-Heavy	Training / shaping
Premium Matte	★★★★☆	★★★★☆	Mid	Lifestyle / sets
Lightweight Studio	★★★★☆	★★☆☆☆	Light	Tops / layers

Product Application Library

Fabric choice should follow silhouette, support level and end use.

Square-neck tank

V-neck cami

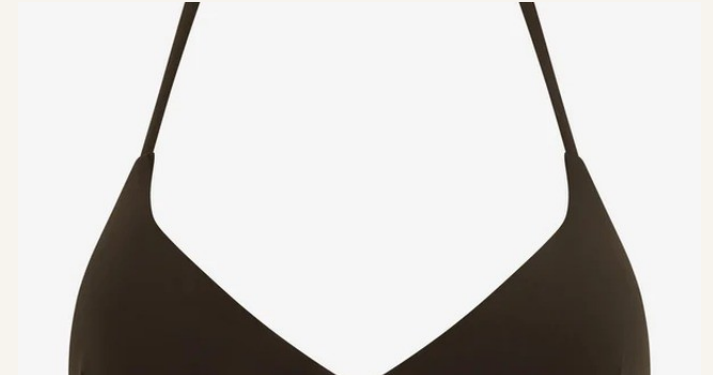

Halter top

Compression short

Studio short

Support bra

Pattern, seam placement, lining and elastic specification are developed separately for each style.

Fit & Pattern Development

Premium activewear fails quickly when the pattern ignores fabric stretch and recovery.

WE FOCUS ON

- Torso balance and garment length
- Waist / hip shaping
- Neckline and armhole stability
- Compression distribution
- Seam placement under movement
- Fit review before bulk production

**Fit is developed together with
the selected fabric—not after it.**

Development Process

A simple path from reference to approved production.

01 BRIEF

Reference images, product category, quantity, target date

02 FABRIC

Shortlist suitable performance fabrics and trims

03 PATTERN

Pattern development based on desired fit and function

04 SAMPLE

Prototype, fitting feedback and necessary adjustment

05 APPROVAL

Confirm sample, colors, labels, packaging and quantities

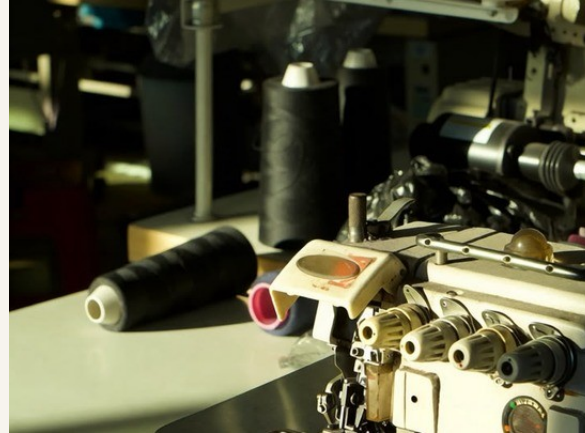

06 PRODUCTION

Bulk manufacturing, QC and shipment

Lead times begin after the required information, fabric direction and payment conditions are confirmed.

Quality Control & Compliance

Quality is checked through development—not only at final inspection.

BSCI CERTIFIED FACTORY

- Incoming fabric / trim review
- Measurement and workmanship checks
- Fit consistency against approved sample
- Inline production inspection
- Final QC before shipment

Specific fabric test reports and certifications depend on the selected material supplier and can be confirmed during sourcing.

MOQ · Sample · Timeline

Clear starting points for custom development.

Production MOQ

100 pcs / style / color

Mixed sizes available. Final MOQ may vary by fabric and construction.

Standard Sample

USD 150 / style

Approx. 15–20 working days after complete information and fabric readiness.

Priority Sample

USD 200 / style

Approx. 10–14 working days, subject to fabric and sample-room capacity.

Bulk Production

Approx. 30–45 days

Planned after sample, materials, payment and production details are approved.

Courier, special fabrics, custom dyeing, complex trims and packaging are quoted separately.

LET'S BUILD YOUR NEXT COLLECTION

Send us 2-3 reference styles, estimated quantity,
target delivery date and destination.

We will recommend the fabric direction, development route and next step.
